

# About Typeright by iTranslate

Born in 2009 and headquartered in Austria/Europe, iTranslate developed into a prominently featured App, from International Press to various App Stores and Television ads. Our mission is to enable travelers, students, business professionals, employers, and medical staff to read, write and speak in all languages, anywhere in the world. And with Typeright, we went even beyond breaking language barriers by striving for effective and clear communication.

iTranslate's consumer offering spans applications such as iTranslate Translator - which with over 200M downloads is the leading independent translation and dictionary app in the world - iTranslate Converse, and Typeright, the AI-powered writing assistant.

Typeright by iTranslate instantly enhances your writing with the unyielding power of AI. Our powerful features let you write down exactly what's on your mind - mistake-free, clear, and just one tap away.

Within the app's PLUS version, you can find numerous new and exciting features to improve your writing!

- Typeright works for English and offers all its features for German, too. We make sure you become the most confident writer, no matter the language!
- Synonyms make your writing more vibrant and compelling. But contextual synonyms are even smarter and go one step further. Based on the context of your story or text, Typeright splits up its synonym suggestions into categories and lets you choose which one fits your writing best.
- When language translation meets writing assistance, you know that you just found a new power couple. You're writing something in English but only know the next word or phrase in your native language. With Typeright's translation feature, you'll stop wasting valuable time looking up the English or German translation and get instant translations within the app.

The Typeright app is available for iOS and Android. Users can also get the Typeright Web Extension for Safari, Chrome, Edge, and Firefox.

## Typeright Basic FEATURES

- Grammar Check
- Punctuation Check
- Spelling Check
- Predictive Typing
- Personal Dictionary
- Multi-Language Support (English & German)

## Typeright PLUS FEATURES

- Contextual Synonyms: Based on the context of your text, Typeright splits up its synonym suggestions into categories and lets you choose which one fits your writing best.

- Mood Detection: Typeright's Mood Detector applies the specific grammar rules for your writing's right mood - be it an informal text to a close friend, an essay for your next assignment at school, or drafting a new blog post.
- Translation: Type the word in your native language and stop wasting valuable time looking up the English translation
